

## ICSI 418Y – Project Milestone 2

### User Stories, Use Cases and Non-functional requirements.

**Objective:** Each team is required to meet this milestone by submitting their user stories, use cases and non-functional requirements.

**Requirements:**

The milestone document should include the following items:

- Project Title.
- List of user stories grouped by user personas.
- Use cases of 5 most critical requirements of your project.
- List of Non-functional requirements.

User stories should be in the following template:

“As \_\_\_\_\_ I want to \_\_\_\_\_ so that I can \_\_\_\_\_”

There is no one standard template for use cases. Many can be found online at:

<https://templatelab.com/use-case-templates/>

Feel free to use any of these or to make your own, but your whole team should use the same template.

**Submission Instructions:**

Each team will prepare a report containing all the items listed above. In addition, you will prepare a 5–7-minute presentation containing all the user stories and non-functional requirements that you will use to present your work in class on 03/05 and 03/07. The report and presentation file names must follow this naming convention:

- TeamXX- Milestone 2- Report
- TeamXX- Milestone 2- Presentation

For this milestone, one of the team members will submit their report (in PDF form) and the presentation on Brightspace.

**Late Submission Policy:**

No Late submissions will be accepted.
