

User Authentication Use Case:

ID:	userAuthenticationUseCase
Title:	User Authentication
Description:	The user authentication use case will have stuff that the user authentication user persona and their user story will want to have.
Primary Actor:	The user.
Preconditions:	Standby and waiting for the user to input their login information.
Postconditions:	Waiting until the user finishes using the system?
Main Success Scenario:	If the login information for the user was correct, log them in, and if incorrect, show an error.
Extensions:	The teacher may also want to be able to login or sign up to use the system and so, they might need to be authenticated as a user.
Frequency of Use:	As often as the user wants to login and use the system.
Status:	In Development.
Owner:	Rusho Binnabi
Priority:	Critical.
