Group Members - Team 6:

- Rusho Binnabi
- Danny Peck
- Menachem Rubin
- Matthew Niemczyk
- Danica Porter

User Personas and their Stories:

- **Students:**
    - As a student, I want to be able to view my quiz cards so that I can save and edit them.
    - As a student, I want to be able to create any number of cards I want so that I can study as much information as possible.
    - As a student, I want to be able to contact support for the site so that I can report any issues that I might experience.
    - As a student, I want to be able to create an account so that I can have my own sets of cards.
    - As a student, I want to be able to share and "download" cards from others so that I can use them.

Use cases of 5 most critical requirements of your project:

- **Student:**

Student Use Case:

ID:	**studentUseCase**
Title:	Student
Description:	The student use case will have stuff that the student user persona and their user story will want to do.
Primary Actor:	A student.
Preconditions:	Standby and ready for use.
Postconditions:	Ready for next input.
Main Success Scenario:	The student will typically want to login or create their account, view their quiz cards, save/download them if they want to, share their cards with others, edit the cards as they see fit, etc.
Extensions:	The student may also be a teacher such as when they are a TA or a graduate student who happens to be teaching a class.
Frequency of Use:	This student use case will be used very frequently.
Status:	In Development.
Owner:	Rusho Binnabi.
Priority:	Critical.
